

Valvoline offers an Engine Guarantee! up to 300,000 miles.

How it works

1-Register your vehicle by 125,000 miles on-line at

2-Have your oil changed with Valvoline every 3,000 miles with a 1,000 mile grace period.

3-Record your service online and keep your receipts. Valvoline recommends changing your oil every 3,000 miles. Why?

More than 80% of consumers drive under severe conditions (stop and go, short trips, towing, or hot or very cold temperatures). Auto manufacturers' maintenance recommendations are dramatically shorter for severe driving conditions. Changing the oil and filter every 3,000 miles is the best way to ensure engine health.
